

Streamlining IT Procurement

Automating Standard Laptop Orders with Flow Designer

Project Title	Streamlining IT Procurement
Project	Automating Standard Laptop Orders with Flow Designer
Prepared By	Ashmi J
Platform	ServiceNow
Phase	Phase 8 - Presentation & Final Submission

Phase 8 - Presentation & Final Submission

Purpose: Present the project clearly and prepare the final submission materials.

1. Project Presentation

The project presentation explains the problem, objectives, requirements, design, Flow Designer automation, testing, and results.

Presentation Content

- Explain the procurement problem addressed by the project.
- Describe the objective of automating Standard Laptop orders.
- Explain the service catalog requirements and approval process.
- Describe the Flow Designer design and automation.
- Explain the Service Catalog trigger and Create Catalog Task action.
- Show how the requested item is used to create the Catalog Task.
- Explain the Hardware assignment group and Approved condition.
- Present the testing approach and observed results.

2. Demonstration

Demonstrate a Standard Laptop request from submission through approval and procurement task completion.

Demonstration Flow

- Open ServiceNow and navigate to Service Catalog.
- Open the Hardware category and select Standard Laptop.
- Click Order Now to submit the request.
- Open the generated Request Number and review the request.
- Open the Approvers section and approve the request.
- Open the Requested Item record.
- Navigate to the Catalog Tasks section.
- Open the generated Catalog Task.
- Verify the task status, Short Description, and Hardware assignment group.
- Confirm that the procurement task has been completed through the configured automation.

3. Submission Files

Organize the project phase PDFs, screenshots, documentation, and relevant project evidence in the GitHub repository.

Recommended Repository Structure

Folder / File	Purpose
Phase-1 to Phase-8 PDFs	Store all phase-wise project documents.
Screenshots	Store ServiceNow configuration, Flow Designer, request, approval, and task evidence.
Documentation	Store project documentation and supporting guides.
Project Evidence	Store relevant screenshots and other supporting evidence.
README	Provide project overview, objective, setup, workflow, testing, and final outcome.

4. Final Outcome

The completed project is submitted with a clear repository structure and supporting documentation. The final submission demonstrates the Standard Laptop procurement automation, including request submission, approval, Flow Designer processing, Catalog Task creation, and task completion.

5. Final Submission Checklist

- ☐ Project title and author details are clearly documented.
- ☐ Project presentation covers the problem, objectives, requirements, design, automation, testing, and results.
- ☐ Standard Laptop request demonstration is prepared from submission through task completion.
- ☐ All phase PDFs are organized.
- ☐ Relevant ServiceNow screenshots are included.
- ☐ Configuration and project documentation are included.
- ☐ Project evidence is organized in the GitHub repository.
- ☐ Repository structure and supporting documentation are complete.

Project Note: This Phase 8 document is prepared for organizing the TN Skills project evidence and can be supplemented with actual screenshots/configuration details.
