

Streamlining IT Procurement

Automating Standard Laptop Orders with Flow Designer

Project Name	Streamlining IT Procurement
Application	ServiceNow - Flow Designer
Prepared By	Ashmi J
Project Focus	Automating Standard Laptop Orders

Overview

This project demonstrates the automation of a Standard Laptop service catalog request using ServiceNow Flow Designer. The flow creates a Catalog Task after the service request is approved and assigns the task to the Hardware assignment group.

Activity 1: Create a Flow to Create Catalog Task

Story: Create a Flow to Create Catalog Task

Duration: 40m

Objective: Create a Flow Designer flow that creates a Catalog Task after approval of the service request and assigns it to Hardware.

- Open ServiceNow.
- Click on All and search for Flow Designer.
- Click on Flow Designer under Process Automation.
- Click New and select Flow.
- Under Flow Properties, give the Flow Name as Standard laptop task.
- Set the Application as Global.
- Select System user for Run as.
- Click Submit.
- Click Add a trigger.
- Search for and select Service Catalog, then click Done.
- Under Actions, click Add an action.
- Search for and select Create Catalog Task.
- For Request item, drag and drop the Requested Item Record. The table will be auto-populated as a Catalog Task.
- Set Short description to Laptop need to Configured.
- Click Add field value; select Description and enter Laptop need to Configured.
- Select Assignment group and set the value to Hardware.
- Select Approval and set the value to Approved.
- Leave the remaining fields as default and click Done.
- Save the Flow.
- Click Activate, and click Activate again to confirm.

Activity 2: Flow Assignment to Standard Laptop Service Catalog

Story: Flow Assignment to Standard Laptop Service Catalog

Duration: 11h 40m

Objective: Associate the newly created Flow with the Standard Laptop catalog item.

- Open ServiceNow.
- Click All and search for Maintain Items.
- Select Maintain Items.
- Under the Name field, search for Standard Laptop and select that record.
- Under the record, select Process Engine.
- Remove the remaining automations and add Flow.
- Add the flow created with the name Standard Laptop Task.
- Click the menu and save the record.

Expected Result

The Standard Laptop catalog item is configured to use the Standard Laptop Task Flow for its process automation.

Activity 3: Service Catalog for Placing Order and Getting Approval

Story: Service Catalog for Placing Order and Getting Approval

Duration: 20m

Objective: Place a Standard Laptop request, approve the request, and verify the generated Catalog Task.

- Click on All and search for Service Catalog.
- Open Service Catalog and click on Hardware.
- Scroll to find Standard Laptop and click on it.
- Click Order Now to place the request.
- View the Order Status and click on the Request Number.
- Open the Requested record.
- Scroll down to the Approvers section.
- Right-click the record, open the configuration options, and select Approve.
- Open the Requested Item section and select the Requested Item record.
- Scroll down to the Catalog Tasks section.
- Open the Catalog Task record and verify the updated status, Short Description, and Assignment Group.

Expected Result

After approval, the flow creates the Catalog Task with the specified short description and assigns it to the Hardware group.

Phase 5 - Testing

Purpose: Verify that the application and automated flow work correctly under expected scenarios.

Testing Details

Test Type	Details
Functional Testing	Check request creation, field validation, flow triggering, approvals, task generation, and completion.
Positive Test	Submit a valid laptop request and verify that the workflow moves through the expected stages.
Negative Test	Submit incomplete or invalid information and verify that validation prevents incorrect processing.
Result	Record test observations, correct configuration issues, and repeat tests until the expected behavior is achieved.

Project Note: This phase document is prepared for organizing the TN Skills project evidence and can be supplemented with actual screenshots/configuration details.
